Interested in exploring a career in STEM teaching?

The American Museum of Natural History and Barnard College Teaching Experiences for Undergraduates (TEU) program is a seven-week immersive summer experience in secondary science and mathematics education in New York City, funded by the Carnegie Corporation of New York.

TEU participants earn a generous stipend, take a course in either science or mathematics pedagogy, and apply what they learn to teach New York City public school students under the supervision of a master teacher-mentor.

The program dates are June 26–August 4, 2023.

For more information and to apply: TEU.vassar.edu

The program is non-residential

Participants will need to provide their own housing
